(Dodge, Washington, Saunders)

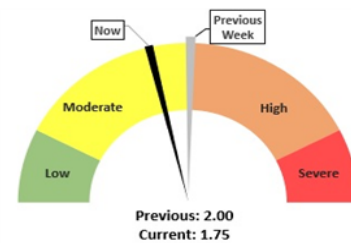

#### Dodge

#### Washington

#### Saunders

Updated September 23rd, 2020

The main factors considered in the risk dials each week include:

- The increase in the number of COVID-19 cases over the past three weeks.
- The increase in the percentage of positive COVID-19 tests.
- The capacity of the district and local healthcare system including the number of patients hospitalized with COVID-19 and the ventilators being utilized by COVID-19 (suspect and confirmed patients).
- The presence of community clusters and or community spread.
- The availability of testing in the district and local communities.
- The availability of 3RPHD to trace all identified contacts of positive cases in 48 hours.

“Please remember that COVID-19 is in all of our communities—we need everyone to do their part. Stay home if you are sick, stay home if you are being tested for COVID-19 and wear a face covering” said Terra Uhing, Executive Director of Three Rivers Public Health Department.

As a reminder 3RPHD updates the community risk dials each Wednesday, and the 3RPHD Data Dashboard is updated each weekday. Please visit our website to learn more.
